PLQ-35

No.1 WORLD LEADER IMPACT DOT MATRIX PRINTER SINCE 1996

A 24-pin dot matrix passbook printer, designed as an economic solution, offering reliability, as well as fast printing and a modern design.

The PLQ-35 is a dot matrix printer that is affordable, ultra-reliable and has the capability to handle passbooks. The product is able to replicate previous emulations, which reduces the need for retraining.

When an economic solution is needed to replace existing passbook printers, the PLQ-35 is the ideal choice. With a 150% improved mean time between failures of 35,000 hours and reliable dot matrix technology, you can depend on these printers to deliver high-quality output with minimal intervention.

In addition, when time is of the essence, the PLQ-35 delivers fast printing of up to 540 characters per second (High-Speed-Draft, 10cpi), utilising 24-pins and 94 columns. Additionally, up to 6 copies can be produced simultaneously with the original.

The printer's performance is matched by its cost-effectiveness. The ribbon is compatible across all of the Epson Passbook range and represents a budget friendly printing solution. Keep costs of business down, while keeping inline with current demands for CSR and organisational waste.
